Robert Finizio Co-founder & Chief Executive Officer Therapeutics Moreover for Her. For Life.

Forward-Looking Statements

This presentation by TherapeuticsMD, Inc. (referred to as "we" and "our") may contain forward-looking statements. Forward-looking statements may include, but are not limited to, statements relating to our objectives, plans and strategies, as well as statements, other than historical facts, that address activities, events or developments that we intend, expect, project, believe or anticipate will or may occur in the future. These statements are often characterized by terminology such as "believe," "hope," "may," "anticipate," "should," "intend," "plan," "will," "expect," "estimate," "project," "positioned," "strategy" and similar expressions and are based on assumptions and assessments made in light of our managerial experience and perception of historical trends, current conditions, expected future developments and other factors we believe to be appropriate.

Forward-looking statements in this presentation are made as of the date of this presentation, and we undertake no duty to update or revise any such statements, whether as a result of new information, future events or otherwise. Forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties, many of which may be outside of our control. Important factors that could cause actual results, developments and business decisions to differ materially from forward-looking statements are described in the sections titled "Risk Factors" in our filings with the Securities and Exchange Commission, including our most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, as well as our current reports on Form 8-K, and include the following: whether the FDA will approve the NDA for our TX-001HR product candidate and whether such approval will occur by the PDUFA target action date; our ability to maintain or increase sales of our products; our ability to develop and commercialize our hormone therapy drug candidates and obtain additional financing necessary therefor; whether we will be able to comply with the covenants and conditions under our term loan agreement; the length, cost and uncertain results of our clinical trials; potential of adverse side effects or other safety risks that could preclude the approval of our hormone therapy drug candidates; our reliance on third parties to conduct our clinical trials, research and development and manufacturing; the availability of reimbursement from government authorities and health insurance companies for our products; the impact of product liability lawsuits; the influence of extensive and costly government regulation; the volatility of the trading price of our common stock; and the concentration of power in our stock ownership.

TX-001HR, TX-005HR, and TX-006HR are investigational drugs and are not approved by the FDA. This non-promotional presentation is intended for investor audiences only.

PDF copies of press releases and financial tables can be viewed and downloaded at our website: www.therapeuticsmd.com/pressreleases.aspx.

For Her. For Life.

Therapeutics MD (TXMD)

Innovative women's health company exclusively focused on developing and commercializing products for women throughout their life cycles

1 Worldwide commercial rights for multiple hormone therapy products

- Drug candidate portfolio is built on SYMBODA™ technology for the solubilization of bio-identical hormones
- Well-known chemical entities with established safety and efficacy thresholds
- Strong global intellectual property portfolio with 219 global patent applications and 19 issued US patents
- 2 Established US commercial business marketing prescription prenatal vitamins to established OB/GYN customer base
- Number 1 commercially covered prenatal vitamins
- 3 Experienced leadership team with proven development and commercial success in women's health

Reference: Data on file. TherapeuticsMD, Inc. calculated using market data from PHAST Symphony

Therapeutics MD®

For Her. For Life.

Seasoned Management Team with a Proven Track Record of Commercial Success

- Former US Secretary of Health and Human Services (2001-2005)
- Holds multiple board memberships, including Centene and United Therapeutics
- · 40-year public health career

- · Former Chief Executive
- · Officer and Chief Financial
- Officer of Shire PLC
 Former Vice President of Corporate Finance at AstraZeneca
- Holds multiple board memberships, including Chairman of Revance Therapeutics

- Former President and Chief Executive Officer of Boehringer Ingelheim (US)
- Former EVP of Customer Marketing and Sales of US Human Health at Merck
- Holds multiple board memberships, including Catalent

- Co-founded vitaMedMD in 2008
- Co-founded CareFusion (Sold to Cardinal Health in 2006)
- 22 years of experience in early stage healthcare company development: ESI. OmniCell, CareFusion

- Co-founded vitaMedMD in 2008
- 25 years of experience in healthcare/women's health
- Past OBGYN Department Chair - Boca Raton Regional Hospital
- Past ACOG Committee
 Member
- OBGYN trained University of Pennsylvania

- · Co-founded CareFusion
- Held executive sales and operation management positions at McKesson, Cardinal, and Omnicell
- 20+ years of operations experience

- Former CFO of American Wireless, Telegeography, and WEB Corp
- Participated in American Wireless/Arush Entertainment merger
- Former KPMG and PricewaterhouseCoopers accountant

- Former Clinical Lead of Women's Health at Pfizer
- 15+ years of experience developing women's health products
- Reproductive endocrinologist & infertility specialist

- 20+ years of commercial and marketing experience
- SVP of the Pfizer Consumer Healthcare Wellness Organization
- Commercial lead for sales and marketing of the Pfizer Women's Health Division

- 25+ years of women's health pharmaceutical experience
- Product development leader for J&J, Wyeth, Aventis, and others
- Worked on development of Prempro®, Premphase®, and Estalis®

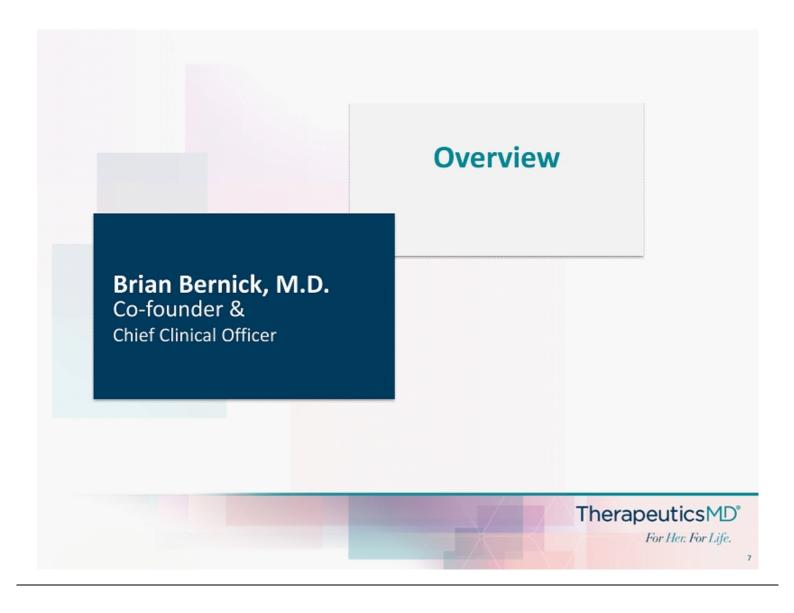

- 16+ years of experience in the pharmaceuticals and biotech
- Created a national sales channel, led the Specialty Diagnostics business at ViaCell. Inc.
- Product launch and sales management roles at Eli Lilly & Company and KV Pharmaceutical

- · 20 years of industry experience
- Pfizer Head of Government and Institutional Accounts
- Covered all the Pfizer franchises including Women's Health, Cardiovascular, Pain, Oncology, Specialty, and Generics.
- · Global Pricing Head for Sanofi

Therapeutics MD°

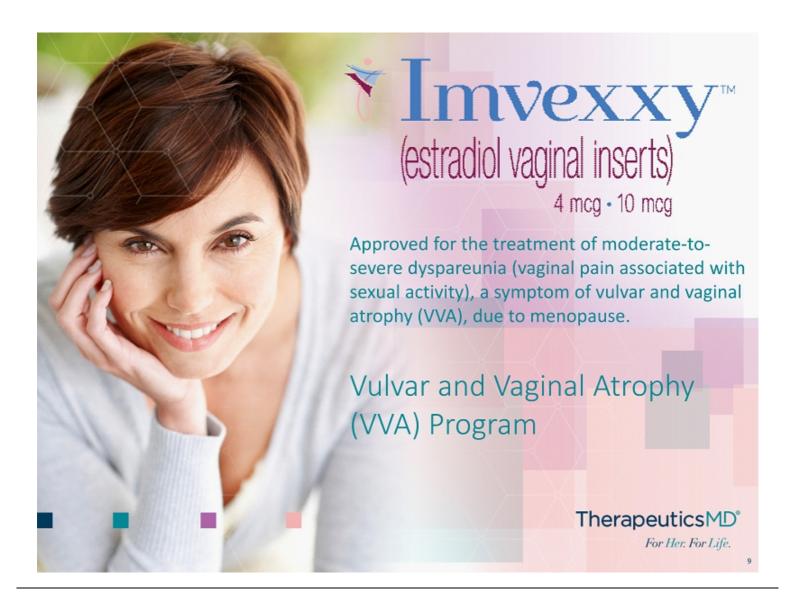

TherapeuticsMD Approach to Drug Development

- Drug development/discovery
- Designed with the patient and healthcare provider in mind
- Guiding principles
 - Better user experience
 - More comfortable
 - More convenient
 - Affordable
 - Safety and efficacy
 - Efficiency

Therapeutics MD°

VVA and its Impact

Sheryl Kingsberg, Ph.D

Division Chief, OB/GYN Behavioral Medicine, UH Cleveland Medical Center

- Co-Director, Sexual Medicine and Vulvovaginal Health Program, UH Cleveland Medical Center
- Professor, Obstetrics and Gynecology, CWRU School of Medicine
- Professor, Psychiatry, CWRU School of Medicine
- President of the North American Menopause Society (NAMS)
- Past President of International Society for the Study of Women's Sexual Health (ISSWSH)
- Leading expert in sexual medicine and menopause
- Lead author for the pivotal peer reviewed publications on female sexual disorders and menopause
- Associate Editor for Sexual Medicine Reviews and editorial board of Menopause
- Principal investigator for multiple clinical trials of sexual disorders and menopause

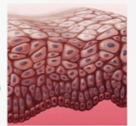

Therapeutics MD°

Vulvar and Vaginal Atrophy (VVA)

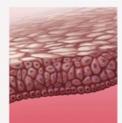

- A component of genitourinary syndrome of menopause (GSM)
- Chronic and progressive condition that results from decreased estrogen levels characterized by thinning of vaginal tissue
- Diagnosed in approximately 50% of postmenopausal women¹
- Primary symptom = dyspareunia (painful intercourse)
- Secondary symptoms include: vaginal dryness, itching, irritation, bleeding with sexual activity, dysuria, urgency, frequency, recurrent UTIs, and incontinence
- Current treatments include: prescription hormone creams, tablets, and rings in addition to over-the-counter lubricants

HEALTHY VAGINAL TISSUE

- Thick
- Moist
- · High estrogen level
- Low pH (<5)
- Increased superficial cells (>15%)
- Decreased parabasal cells (<5%)

ATROPHIC VAGINAL TISSUE

- Thin
- Dry
- · Low estrogen level
- High pH (>5)
- Decreased superficial cells (<5%)
- Increased parabasal cells (>30%)

Women's Health Initiative Observational Study

Breast cancer, endometrial cancer, and cardiovascular events in participants who used vaginal estrogen in the Women's Health Initiative Observational Study

Carolyn J. Crandall, MD, MS, ¹ Kathleen M. Hovey, MS, ² Christopher A. Andrews, PhD, ³ Rowan T. Chlebowski, MD, PhD, ⁴ Marcia L. Stefanick, PhD, ⁵ Dorothy S. Lane, MD, MPH, ⁶ Jan Shifren, MD, ⁷ Chu Chen, PhD, ⁸ Andrew M. Kaunitz, MD, ⁹ Jane A. Cauley, DrPH, ¹⁰ and JoAnn E. Manson, MD, DrPH¹¹

- Long-term safety of women using only U.S. FDA-approved vaginal estrogen products
 - 45,663 users of vaginal estrogen

Menopause. 2018 Jan;25(1):11-20

- Median duration of use of 2-3 years and median duration of follow-up of 7.2 years
 - Representing over 300,000 patient years of data
- Risks of breast cancer, endometrial cancer, colorectal cancer, stroke, and pulmonary embolism/deep vein thrombosis were not statistically different between vaginal estrogen users and nonusers
- Risks of CHD, fracture, all-cause mortality, and GIE were lower in users than in nonusers

Professional Societies and FDA Recommend the Lowest Effective Dose

American College of Obstetricians and Gynecologists (ACOG)¹

"Low-dose and ultra-low systemic doses of estrogen may be associated with a better adverse effect profile than standard doses and may reduce vasomotor symptoms in some women."

North American Menopause Society (NAMS)²

"The lowest dose of HT should be used for the shortest duration needed to manage menopausal symptoms. Individualization is important in the decision to use HT and should incorporate the woman's personal risk factors and her quality-of-life priorities in this shared decision."

FDA³

"...this guidance encourages sponsors to develop the lowest doses and exposures for both estrogens and progestins for indications sought, even though specific relationships between dose, exposure, and risk of adverse events may not be known."

- Small, digitally inserted, softgel capsule that dissolves completely
- Easy to use without the need for an applicator
- New lowest effective dose of estradiol 4 mcg and 10 mcg
- Used any-time of day with high patient satisfaction rates
- No label adverse drug reactions of vaginal discharge or abnormal pap smears
- Strong efficacy data for moderate to severe dyspareunia (evaluated as most bothersome symptom;
 90% of women also reported moderate to severe vaginal dryness at baseline)
- Supports vaginal health and microbiome through improvements in pH and vaginal cytology
- Efficacy demonstrated at 12 weeks (primary endpoint), and as early as 2 week (secondary endpoint)
- pK data doesn't increase systemic hormone levels beyond the normal postmenopausal range
- Mechanism of action and dosing that is familiar and comfortable
- No patient education required for dose preparation or applicators
- Two-times-a-week maintenance dosing
- Dose packaging to optimize compliance and convenience
- Strong patent estate with patent expirations starting 2032

Imvexxy is "Redefining Relief"

Owning <u>clinical</u> attributes with the underpinning of a <u>highly effective patient experience</u>

Key Clinical Attributes:

1	New lowest effective dose
2	Strong efficacy and safety data
3	Improvement seen at week 12 (primary) and as early as 2 weeks (secondary)
4	PK data where systemic hormone levels remain within normal postmenopausal range

Key Physical Attributes:

5	Ease of use and absence of applicator
6	Ability to be used any time of day
7	A mess-free way to administer
8	Dose packaging to optimize patient compliance and enhance provider and patient acceptance

Therapeutics MD°

Payer Overview

Bob Lahman

Ret. Sr. VP OptumRx

Robert Reid

VP Market Access Operations Syneos Health

Mike Steelman VP Market Access TherapeuticsMD

Therapeutics MD°

What is Market Access?

Market access is the process to ensure that all appropriate patients who would benefit, get rapid and maintained access to the brand, at the right price

Access Objectives:

- 1. Reimbursed by health plans and PBMs
- Easily prescribed by healthcare providers (Unrestricted Access)
- 3. Reasonable copay amounts for patients
- Available through a variety of supply chain sources

Therapeutics MD°

For Her. For Life.

IMVEXXY Market Access Dynamics

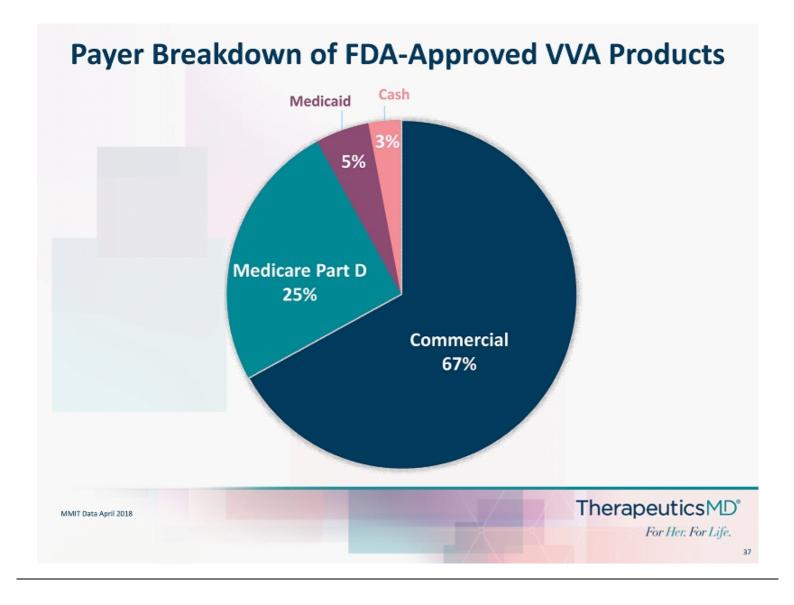

Unrestricted Access

- Majority of products in VVA category for majority of plans and PBMs currently have "Unrestricted Access"
- Remains a low cost category compared to other therapeutic areas
 - Managing this category is not a priority
- Importance of providing choice for women & prevent associated co-morbidities
- Lack of innovation in VVA category

Pricing and Contracting Dynamics

- Payers expect new products to be priced at parity to covered branded products at launch
- WAC price guidance for new category entrants ranged from \$150-\$180 a month
- Impact of generics have been confined to reference brands
- Contracting for new brands to secure access for a non-preferred brand tier position

Therapeutics MD°

VVA Class Commercial Coverage:1

Prior Authorization Example in the VVA Class

- The majority of commercial payers do not require PA/ST for branded VVA treatments today¹
- However, select payers require written PA and stepping-through one or two preferred products in selected cases
 - Unlikely for Imvexxy to step-edit through a higher dose vaginal estrogen product
- Low dose vaginal estrogen remains frontline therapy

		RITERIA: CHECK ALL BOXES THAT APPLY not filled out are considered not applicable to your patient & MAY AFFECT THE OUTCOME of this request.
OIE.	Ally dieds	not filled out are considered not applicable to your patient & MAT AFFECT THE OUTCOME of this request.
Yes	□ No	Patient is female
Yes	□ No	Patient has a diagnosis of moderate-to-severe dyspareunia due to vulvar and vaginal atrophy (VVA) associated with menopause
Yes	□ No	Patient has had a trial of, or insufficient response to one preferred vaginal estrogen product (that is, Premarin vaginal cream, Vagifem, or Femring)

In May 2018, CMS clarified that drugs used consistent with this labeling (the treatment of moderate to severe dyspareunia, a symptom of vulvar and vaginal atrophy due to menopause) are not excluded from Medicare Part D under §1860D-2(e)(2)(A) of the Social Security Act.²

Therapeutics MD°

NAMS Recognizes and Commends CMS Clarification of GSM Drug Coverage

From JoAnn V Pinkerton, MD, NCMP, Executive Director

- The North American Menopause Society (NAMS) joins The International Society for the Study of Women's Sexual Health, the American College of Obstetricians and Gynecologists, and other major organizations in recognizing the Centers for Medicare and Medicaid Services (CMS) for acting on a major health concern for postmenopausal women by no longer excluding from Medicare Part D coverage drugs for the treatment of moderate to severe dyspareunia due to menopause when used consistent with this labeling under their "Prescription Drug Benefits" section 1860D-2(e)(2)(A) of the Social Security Act.
- Postmenopausal women can now receive access to newer, tested, and effective FDA-approved therapies to relieve symptoms and signs of vulvovaginal atrophy (VVA), a component of the genitourinary syndrome of menopause (GSM).

Therapeutics MD°

Impact of Generics

- Commercial plans- impact of generics has been to move branded product to 3rd Tier and generic product to 1st Tier.¹
- Medicare- impact of generics has been to move brand to not covered and generic to generic/preferred/covered.¹

Commercial Coverage Tier	Vagifem	Yuvafem
Generic (Preferred)	<1%	6%
Preferred	14%	55%
Preferred (PA/ST)	4%	<1%
Covered	66%	28%
Covered (PA/ST)	6%	4%
Specialty		<1%
Not Covered	10%	5%
Total Unrestricted	80%	89%

Medicare Coverage Tier	Vagifem	Yuvafem
Generic (Preferred)		2%
Preferred	7%	34%
Preferred (PA/ST)	1%	
Covered	11%	23%
Covered (PA/ST)	6%	
Specialty	1%	
Not Covered	73%	41%
Total Unrestricted	19%	59%

Treatment Compliance Program & Gross-to-Net Assumptions

Robert FinizioCo-founder &
Chief Executive Officer

Therapeutics MD°

For Her. For Life.

Developed for Imvexxy and TX-001HR Launch

- Prenatal line was developed ONLY as infrastructure to accelerate the launch of Imvexxy and TX-001HR
 - Compliance and Education program that effectively reduces out of pocket costs for patient 85% of the time
 - Applied and customized sales rep technology platform (Edge)
 that utilizes Artificial Intelligence and we believe is best in class
 - Very strong 9-year presence in top prescribing OB-GYN offices
 - Developed retail relationships, payer network and distribution channel

Therapeutics MD°

For Her. For Life.

TXMD's Patient Engagement Programs for Adoption, Affordability & Adherence

Education & Impact of Condition

Product

Accelerate Access to HCP

Patient Support
Affordability Program

Adherence & Persistence

- Developed over the past 6 years in an effort to improve the long term value of a patient through Education, Adherence and Co-Pay assistance
- TXMD utilizes standard pharmaceutical industry programs in a more coordinated and effective fashion – maximizing impact and results
- Program has achieved 85% utilization of the Co-Pay assistance program compared to an industry standard of 30%
- Created and piloted around the prenatal vitamin product line to enhance the launches of Imvexxy and TX-001HR

Therapeutics MD°

Results of TXMD Prenatal Vitamin Adoption & Adherence Programs

Therapeutics MD°

For Her. For Life.

Why this Applies to the VVA Market

Prenatal Vitamins vs. VVA Market Dynamics

Prenatal Vitamins Market

- Industry Average:
 - 2.5 fills per pregnancy
- Lower priced generics in the market
- OTC competition
- Little meaningful product differentiation / No drug claims

VVA Market

- Average fills per year:
 - 3.5 for Vagifem® and Osphena®
 - 1.5 Premarin[®] and Estrace[®] creams
- Lower priced generics in the market
- OTC competition
- Low satisfaction with existing products

Therapeutics MD°

For Her. For Life.

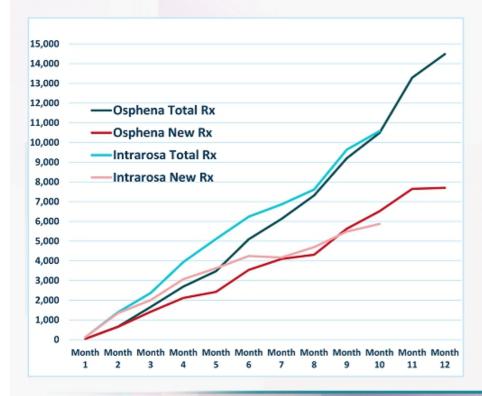

Patient Affordability & Adherence Programs Applied to Imvexxy

Why programs are applicable to Imvexxy:

- Eliminates educational shortcomings leading to improved adoption and compliance
- Manage patient out of pocket and coverage issues
- Imvexxy was designed with the patient in mind
 - Elegant design
 - New lowest effective dose
 - Blister dose packaging makes it easier for HCP to educate patient on use of product
 - Chronic progressive condition that requires periodic re-evaluation of treatment goals and risks for treatment life cycle of each woman

Therapeutics MD°

Recent VVA TRx Launch Trajectories Represent Reasonable Comparators for Imvexxy Launch in Year 1

Rate Limited Factors in Year 1 that Impact Launch:

- ☐ Limited number of new women going onto therapy each year
- Number of women that switch to a new product year 1
- ☐ The impact of the above factors is reduced in years 2 and beyond

How to Measure Progress KPI's to Track

■ Number of new writers & total writers - indicates pace of trial and adoption by HCP
■ New Rx − indicates market penetration against competition
□ Total Rx — overall units sold
☐ Refill Rate — affordability and compliance programs taking hold
□ Ramp of commercial insurance coverage – indicator of adoption by payors and precursor to increases in GTN
☐ Quarterly trend of gross to net

For Her. For Life.

TX-001HR Product Development Rationale

- 2002 Women's Health Initiative (WHI) study showed that synthetic hormones increased the risk of breast cancer, stroke, heart attack and blood clots (all FDA-approved combination hormonal products contain a synthetic Progestin and not a bio-identical Progesterone)
- Post WHI, women and healthcare providers shifted to Bio-Identical Hormone Therapy (BHRT)
 containing bio-identical estradiol and bio-identical progesterone as an alternative despite being unapproved drugs that are not covered by insurance
 - 90M+ scripts of synthetic hormone therapy prescribed annually before 2002, declining to ~10M in 2015¹
 - Today, patients have the choice between three therapies:
 - FDA-approved, synthetic combination hormones
 - FDA-approved, separate bio-identical hormone products
 - Unapproved, compounded bio-identical hormones have not been proven safe and effective, or covered by insurance

- Compounding filled the need for BHRT
 - 30M scripts (3M women) of Compounded Bio-identical Hormone Therapy (CBHRT) prescribed annually in the U.S. currently^{2,3}
- All the major medical societies and the FDA discourage the prescribing of compounded hormones
- No FDA-approved BHRT bio-identical combination product of estradiol + progesterone

- TX-001HR would become the first and only FDA-approved bio-identical combination product to fill this unmet need
- Symphony Health Solutions PHAST Data powered by IDV; Annual 2015
- The reported number of annual custom compounded hormone therapy prescription of oral and transdermal estradiol and progesterones taken combined and in combination (26MM to 33MM)

Pinkerton, J.V. 2015. Menopause, Vol.22, No.9, pp 0-11.

Therapeutics MD®

TX-001HR - Potential Best in Class Therapy

Potential first and only:

- 1) Bio-identical combination estradiol & progesterone
- 2) FDA-approved

Dosing and Delivery

Once-a-day single oral softgel capsule

Addresses Unmet Medical Need

- First and only combination of bio-identical estradiol and bio-identical progesterone product candidate
- Single combination dose option
- Positive Phase 3 Replenish Trial safety and efficacy results
- Third-party reimbursement, if approved

PDUFA target action date October 28, 2018

Strong patent estate with patent expirations starting 2032

Benefits to women, healthcare providers, and pharmacies

NDA to be submitted December 2017; pending FDA review and approval
 Reimbursement anticipated if FDA-approved

Therapeutics MD°

For Her. For Life.

Multi-Billion Dollar Total Substitutable Market Opportunity

Separate Bio-Identical E & P Pills	Product Use by Age	AGES 41-50	AGES 51-60	AGES 61-70	AGES 71+	TRx Totals
	Progesterone*	903,680	1,596,847	902,733	399,665	3,802,9251
SV2 WC	<u>Estradiol</u>	2,297,141	5,033,146	2,722,199	1,476,272	11,578,758 ¹

- FDA-approved separate bio-identical estrogen and progesterone channel alone represents up to \$950M annually at a WAC price of \$250
 - 2 separate copays
 - Not FDA-approved to be used together for endometrial protection
- Potential billion dollar opportunity with even only limited penetration into compounding channel

Therapeutics MD°

3) Assure WAC, princip between 2500-250.

All trademarks are the property of their respective owner

TX-001HR Could Fulfill Therapeutic Gap For All Participants

Patients

- Meet demand for bio-identical hormone therapy with a product approved by FDA on safety and efficacy
- · safe and effective
- · Reduce of out-of-pocket costs via insurance coverage
- · Convenience of one combination product
- · Widely acceptable at all pharmacies and not just compounding pharmacies

Healthcare Providers

- · First and only FDA-approved bio-identical combination hormone therapy
- · Clinically validated dose regimen
- Eliminate risks of compounded hormone therapy
- · Meet patient demands and reduce patient out-of-pocket costs via insurance coverage
- · Follow medical standards of care and society guidelines while reducing liability

Pharmacies

- · Meet patient and physician demand for bio-identical hormone therapy
- · Significantly improve net margin per script with third-party reimbursement
- · Lower legal and regulatory costs and risk

FDA/Regulatory Bodies

- · Reduce need for and use of compounded hormone products
- Full enforcement of regulations regarding compounded hormones
- · Reduce false claims and misleading advertising statements about compounded HT products

Regulatory Environment Continues to Favor FDA-Approved Products

October 2012

Contaminated compounded drugs made at NECC kill 64 people nationwide

2014

Creation of "Do Not Compound" list and established Pharmacy Compounding **Advisory Committee**

<u> 2016</u>

USP <800> finalized, addressing hazardous drugs, including hormones

December 2019

Final implementation of USP <800>

November 2013

Congress enacted **Drug Quality and** Security Act (DQSA)

1) http://www.fda.gov/Drugs/Drugs/Drugs/teg/ffva/fiteg/ffyordSupplyChainSecurity/DrugSupplyCha 2) http://www.usp.org/stes/fdefusit/ffva/vsp_pd/f68/m7808.pdf 3) https://www.usp.com/stes/fdefusit/fflee/schistS00USPS00Defusit/c00015%20FfNAL.pdf

2015

Initiated formation of "Difficult to Compound" list, including addition of hormones

July 2016

FDA released Draft Guidance documents, outlining protocol for commercially available drugs and

January 2018

FDA issued final Guidance on compounded drug products

Therapeutics MD°

Partnering Rationale

Increased Regulatory Pressures Facing Compounding Pharmacies

- Increased FDA and State enforcement of essential copies
- USP <800> now tied to USP <795> significantly increases cost for hormones
- OSHA, FDA, DEA, State, Accreditation Bodies (NAPB, JCAHO, PCAB and others) – All require documentation and compliance

Increased Financial Pressures

- Loss of reimbursement
- Cash pay market is limited once an FDA-approved drug is offered by other compounding pharmacies / coupon
- Increased cost of USP <800>
- Increased cost of regulatory compliance
- Already dispense FDA-approved drugs

Therapeutics MD°

For Her. For Life.

Benefits of Partnering with TXMD

- Reduces or eliminates amount of regulatory pressure
- Reduces initial and ongoing costs of compliance
- Improved topline revenue
- Maintains and improves bottom line profit
- Redeploy internal staff to profitable areas
- Reduce patient out of pocket costs, keep patient happy
- Validates science behind existing B-HRT (vs the Bio-Ignite program – opportunity to increase the overall market like AndroGel® and several others)

Therapeutics MD°

For Her. For Life.

What USP <800> Really Means

Compounding Bioidentical Hormone Therapy (BHRT) Today

Adolphe Pierre-Louis - Albuquerque Journal - 2/13/2017

Compounding BHRT after December 2019

Therapeutics MD°

USP <800> Expenses Create Large Barriers for Compounders

USP <800> Requirements	Cost	Implementation Time	
Segregated Clean Room: USP <800> Design Construction	\$60,000 - \$200,000	1 year – 1.5 years	
Ventilation System	\$25,000 - \$50,000		
New Equipment for Hazardous Compounding	\$15,000 - \$50,000	-	
Total	\$100,000 - \$300,000	1 year – 1.5 years	

- High upfront capital expenditures required for compliance
- Long implementation time
- Increased ongoing operating expenses associated with capital expenditures

Therapeutics MD°

For Her. For Life.

Gross margin	89.0%	20.0%
Operating Expenses		
G&A	\$27.00	\$15.00
S&M	\$9.00	\$5.00
Additional Compounding Costs ³	\$7.50	-
Cost of USP <800> 4	\$15.00	-
Total Operating Expenses	\$58.50	\$20.00
Pre-Tax Profit	\$21.50	\$30.00

- Decreased volumes for bio-identical hormones
- Increased competition on price has resulted in loss of volumes

FDA-Approved product provides ability to charge a more competitive price point

Therapeutics MD°

For Her. For Life.

Assume AWP-18% Third-Party Reimbursement
 Assume STSOWAC less 20% distribution discount
 Sinculuses additional labor, pharmacies, technicians, regulatory, and legal expense
 All December 2019 Implementation; includes >5150,000 capital expenditure as well hazardous drugs

Financial Effect of USP <800> Costs for Small Pharmacies

- Higher prices needed to recoup capital investment and pay for increased operating expenses
- Increased competition on price has resulted in loss of volumes
 - Current pricing unsustainable
- Patients continue to search for lowest cost options

	Pre-USP <800>	Post-USP <800>	TX-001HR Launch
Revenue			
Patient Co-Pay	\$59.95	\$89.95	\$50.00
Third-Party Reimbursement	-	-	200.00
Total Net Revenue	\$59.95	\$89.95	\$250.00 ¹

Key Takeaways

- FDA-approved products enable small pharmacies to compete on price
- Lower patient co-pays help retain existing customers and attract new business
- Implemented this model with Makena® AndroGel®

Therapeutics MD°

BIO-IGNITE™

Compounding Pharmacy Partnership Strategy

BIO-IGNITETM started as an outreach program to quantify the number of compounded bio-identical estradiol and progesterone prescriptions currently dispensed by the 3,000 high-volume compounding pharmacies, and qualify their interests in distributing our hormone product candidates, if approved.

WHAT IT HAS BECOME:

A four-phase strategic initiative to activate all current stakeholders involved in the BHRT community. Ensuring that TX-001HR has the best national access and uptake possible.

Phase 1
Initial
Outreach
Phase 2
Program
Dev.
Phase 3

BIO-IGNITE™ Implementation Plan

Limited Launch Goals

IMVEXXY

Operationalize - This new Segment

- ✓ Develop Case Studies for Marketing
- ✓ Build Trust with New Partners
- ✓ Utilization of Primary & Secondary Wholesalers
- ✓ Class of Trade Programs
- ✓ Develop pull through

Target Program Adoption

- √ 50-100 Pharmacy Partners First Year
- √ 12 Months
- ✓ Actively stocking & filling

Therapeutics MD°

For Her. For Life.

BIO-IGNITE™ Implementation Plan

National Rollout TX-001HR

Complete Program Launch

- ✓ Activation of Imvexxy Partners
- ✓ Peer-to-Peer Promotion
- ✓ Turn-key partner enrollment
- ✓ Product acquisition
- √ Account management programs

Target List

- ✓ Qualified: High-volume BHRT over 1,500
- ✓ Longtail: 3,000

Target Program Adoption

- √ 900 pharmacies
- √ 24 Month Ramp

Life Cycle Management & Financial Update

Robert FinizioChief Executive Officer

Therapeutics MD°

For Her. For Life.

Life Cycle Management

- To mitigate risks of competition and increase the overall value of Imvexxy and TX-001HR assuming we are taking significant market share
 - New formulations / life cycle management for Imvexxy and TX-001HR goals
 - Improved bioavailability
 - Reduced variability
 - Reduced frequency of dosing
 - New lower effective doses
 - New delivery modalities (transdermal)
 - Label expansion and new indications
 - Symptoms of VVA in breast cancer survivors on aromatase inhibitors
 - Dermatologic indications for TX-001HR
- Proof-of-concept studies to begin as early as second half of 2018

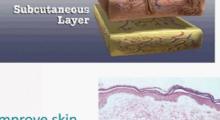

Therapeutics MD°

TX-001HR: Skin Indication

- Skin improvement often observed with compounded Bio-identical **Hormone Therapy**
- Numerous studies demonstrates that estrogen deprivation leads to:
 - · Skin dryness and atrophy
 - Decreased skin thickness and decreased collagen in the dermis
 - Decreased extensibility, consistency & elasticity
 - Diminished skin moisture and fine wrinkling
 - · Altered ultrastructural skin organization
 - · Poor wound healing

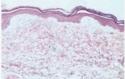

Business Rational

- If approved, only product for hot flashes to have an indication to improve skin
- One of the top complaints for menopausal women
- · Financially bridge TX-001HR into the Aesthetic market domestically and cash pay market Ex-US
- Anticipate meeting with FDA 1Q 2019 to evaluate

Phidermis

Dermis

Flexible, Non-Dilutive Term Loan Financing Secured

- Entered into a definitive loan agreement with MidCap Financial, managed by Apollo Capital Management, L.P., for \$200 million in non-dilutive term loan financing
- The term loan will be available to the company in three tranches following specific milestones through December 31, 2019:
 - \$75 million will be available upon the approval of Imvexxy and intend to draw down immediately
 - Anticipated to be funded on or about June 7, 2018
 - \$75 million will be available upon the approval and launch of TX-001HR
 - \$50 million will be available upon generating \$75 million of trailing twelve month net revenue attributable to Imvexxy and TX-001HR on or before December 31, 2019
- Upon drawing the capital, the term loan will accrue interest at 1-month LIBOR plus 7.75%, which equates to a current interest rate of approximately 9.75%
- No equity or warrants attached and a favorable prepayment fee schedule
- Maturity date: May 1, 2023

Therapeutics MD°

For Her. For Life.

Significant Insider and Institutional Share Ownership

- Board of directors and executive officers have long-term commitment to the company
 - Beneficially own approximately 23% of the company's shares
 - Three founding executives beneficially own approximately 19% of the company's shares ¹
- Large institutional holder support
 - Large institutional holders many long-term beneficially own more than 55% of the company's outstanding shares

Includes vested options to acquire approximately 5 million shares of common stock (approximately 11% of such
executives' current beneficial ownership) that were originally issued on January 1, 2009 and expire on January 1,
2019.
