Forward-Looking Statements

This presentation by TherapeuticsMD, Inc. (referred to as “we” and “our”) may contain forward-looking statements. Forward-looking statements may include, but are not limited to, statements relating to our objectives, plans and strategies, as well as statements, other than historical facts, that address activities, events or developments that we intend, expect, project, believe or anticipate will or may occur in the future. These statements are often characterized by terminology such as “believe,” “hope,” “may,” “anticipate,” “should,” “intend,” “plan,” “will,” “expect,” “estimate,” “project,” “positioned,” “strategy” and similar expressions and are based on assumptions and assessments made in light of our managerial experience and perception of historical trends, current conditions, expected future developments and other factors we believe to be appropriate.

Forward-looking statements in this presentation are made as of the date of this presentation, and we undertake no duty to update or revise any such statements, whether as a result of new information, future events or otherwise. Forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties, many of which may be outside of our control. Important factors that could cause actual results, developments and business decisions to differ materially from forward-looking statements are described in the sections titled “Risk Factors” in our filings with the Securities and Exchange Commission, including our most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, as well as our current reports on Form 8-K, and include the following: whether the FDA will approve the NDA for our TX-001HR product candidate and whether such approval will occur by the PDUFA target action date; our ability to maintain or increase sales of our products; our ability to develop and commercialize our hormone therapy drug candidates and one-year contraceptive vaginal system licensed product and obtain additional financing necessary therefor; whether we will be able to comply with the covenants and conditions under our term loan agreement; the length, cost and uncertain results of our clinical trials; potential of adverse side effects or other safety risks that could preclude the approval of our hormone therapy drug candidates or adversely affect the commercialization of our current or future approved products; the ability of our licensees to commercialize and distribute our product and product candidates; our reliance on third parties to conduct our clinical trials, research and development and manufacturing; the availability of reimbursement from government authorities and health insurance companies for our products; the impact of product liability lawsuits; the influence of extensive and costly government regulation; the volatility of the trading price of our common stock; and the concentration of power in our stock ownership.

TX-001HR, TX-005HR, and TX-006HR are investigational drugs and are not approved by the FDA. This non-promotional presentation is intended for investor audiences only.

Seasoned Management Team with a Proven Track Record of Commercial Execution

Tommy Thompson
Chairman of the Board
- Former US Secretary of Health and Human Services (2001-2005)
- Holds multiple board memberships, including Centene and United Therapeutics
- 40-year public health career
- Co-founded CareFusion
- Former executive sales and operation management positions at McKesson, Cardinal, and Omnicell
- 20+ years of operations experience

Angus Russell
Board Member
- Former Chief Executive Officer and Chief Financial Officer of Shire PLC
- Former Executive Vice President of Corporate Finance at AstraZeneca
- Holds multiple board memberships, including Chairman of Revance Therapeutics

J. Martin Carroll
Board Member
- Former President and Chief Executive Officer of Boehringer Ingelheim (US)
- Former Executive Vice President of Corporate Finance at AstraZeneca
- Holds multiple board memberships, including Chairman of Revance Therapeutics

Jane Barlow
Board Member
- 25 years of clinical and strategic healthcare experience
- Former Chief Medical Officer of CVS Health’s Medicare and Government Services
- Former Vice President of Clinical Innovation at MEDCO Health Solutions

Robert Finizio
Co-Founder, CEO, and Director
- Co-founded vitaMedMD in 2008
- Co-founded CareFusion (Sold to Cardinal Health in 2006)
- 22 years of experience in early stage healthcare company development

Brian Bernick, MD
Co-Founder and Director
- Co-founded vitaMedMD in 2008
- 25 years of experience in healthcare/women’s health
- Past OB/GYN Department Chair - Boca Raton Regional Hospital
- Past ACOG Committee Member
- OB/GYN – trained University of Pennsylvania

John Milligan
President
- Co-founded CareFusion
- Held executive sales and operation management positions at McKesson, Cardinal, and Omnicell
- 20+ years of operations experience

Dan Cartwright
Chief Financial Officer
- Former CFO of American Wireless, Telegeography, and WEB Corp
- Participated in American Wireless/Arush Entertainment merger
- Former KPMG and PricewaterhouseCoopers accountant

Sebastian Mirkin, M.D.
Chief Medical Officer
- Former Clinical Lead of Women’s Health at Pfizer
- 15+ years of experience developing women’s health products
- Reproductive endocrinologist & infertility specialist

Dawn Halkuff
Chief Commercial Officer
- 20+ years of commercial and marketing experience
- SVP of the Pfizer Consumer Healthcare Wellness Organization
- Commercial lead for sales and marketing of the Pfizer Women’s Health Division

Julia Amadio
Chief Product Officer
- 25+ years of women’s health pharmaceutical experience
- Product development leader for J&J, Wyeth, Aventis, and others
- Worked on development of Prempro®, Premphase®, and Estalis®

Christian Bloomgren
VP, Sales
- 16+ years of experience in the pharmaceuticals and biotech
- Created a national sales channel, led the Specialty Diagnostics business at ViaCell, Inc.
- Product launch and sales management roles at Eli Lilly & Company and KV Pharmaceutical

JANIE BARLOW
Board Member
- Co-Founder and Director
- Former CFO of American Wireless, Telegeography, and WEB Corp
- Participated in American Wireless/Arush Entertainment merger
- Former KPMG and PricewaterhouseCoopers accountant
- 25 years of women’s health pharmaceutical experience
- Product development leader for J&J, Wyeth, Aventis, and others
- Worked on development of Prempro®, Premphase®, and Estalis®

Women’s Health Assets With Large Total Addressable Market Opportunities

### Annovera™
- **Indication**: Females to prevent pregnancy
- **Condition Description**: Contraception
- **Active Ingredients**: Segesterone Acetate/ Ethinyl Estradiol
- **Form**: Vaginal System
- **Key Value Proposition**: First and only patient-controlled, procedure-free, long-acting, reversible birth control product
- **Affected US Population**: 43 million women
- **US TAM Opportunity**: $5B
- **Status**: Approved Aug. 10, 2018

### TX-001HR
- **Indication**: Moderate to severe vasomotor symptoms (VMS) due to menopause*
- **Condition Description**: VMS due to Menopause
- **Active Ingredients**: Bio-Identical 17 β-Estradiol + Bio-Identical Progesterone
- **Form**: Oral softgel capsule
- **Key Value Proposition**: Potential first and only bio-identical FDA-approved combination product
- **Affected US Population**: 36 million women
- **US TAM Opportunity**: >$25B
- **Status**: PDUFA Target Action Date: Oct. 28, 2018

### Imvexxy™
- **Indication**: Moderate to severe dyspareunia, a symptom of VVA, due to menopause
- **Condition Description**: VVA due to Menopause
- **Active Ingredients**: Bio-Identical 17 β-Estradiol
- **Form**: Vaginal softgel insert
- **Key Value Proposition**: Easy to use, lowest effective dose, designed to support patient adherence
- **Affected US Population**: 32 million women
- **US TAM Opportunity**: >$20B
- **Status**: Approved May 29, 2018

---

* Potential indication; pending FDA approval

2) QuintilesIMS MIDAS, QuintilesIMS Analysis, Company filings. Long acting reversible contraceptive market includes: Nexplanon/Implanon, Mirena family, ParaGard and Liletta. Net sales as reported in company filings.
3) Derived from U.S. Census data on women in the age group who normally experience symptoms.
4) Based on pre-WHI annual scripts of FDA-approved HT products.
7) Based on market pricing of current FDA-approved HT products.
Annovera™
(Segesterone Acetate/Ethinyl Estradiol Vaginal System)

The first FDA-approved long-acting prescription birth control that is patient-controlled, procedure-free and reversible
Annovera - 1-Year Vaginal System

First and only patient-controlled, procedure-free, long-acting, reversible birth control

- Annovera approved on August 10, 2018
  - Segesterone acetate component of Annovera expected to be classified as NCE with 5 year exclusivity

- Developed by the Population Council – developer of multi-billion dollar long acting contraceptive products
  - ParaGard® and Mirena® IUDs; Norplant® and Jadelle® implants; and Progering®

- Benefits
  - Increase compliance over short acting products
  - Offer women a long-term birth control option without requiring a procedure for insertion and removal like IUDs or Implants
  - Allow women who haven’t had a child (nulliparous) or are not in a monogamous relationship - who are often counseled against IUDs due to the potential risk of infertility - access to long-term reversible birth control

The vaginal system is composed of a “squishy” silicone elastomer
- 21/7 days cyclical dosing regimen for one year (13 cycles)
- 89% overall patient satisfaction in clinical trials

Average daily release over one year of use:
- 0.15 mg/day segesterone acetate
- 0.013 mg/day ethinyl estradiol

Nestorone: progesterone derived unique progestin
- High progestational potency and anti-ovulatory activity
- No androgenic, estrogenic or glucocorticoid effects at contraceptive doses

Strong safety and efficacy data
High patient satisfaction and acceptability

---

Clinical Trial Experience

Efficacy & Safety

- Based on two pivotal Phase 3 clinical trials with 2,308 women
  - Efficacy and safety consistent with other birth control pills, patches and hormonal rings

- Efficacy
  - Highly efficacious in preventing pregnancy when used as directed (97.3%)
    - Primary Endpoint Pearl Index was 2.98 per 100 woman-years
    - Consistent with all other combination hormone birth control pills, patches and rings

- Safety
  - Class labeling for combination hormonal contraceptives (CHCs)
  - All CHCs carry the boxed warning about cigarette smoking and serious cardiovascular events, particularly for women over age 35
  - The risk profile is consistent with other CHCs
  - The most common adverse reactions include headache, nausea/vomiting, vulvovaginal mycotic infections, abdominal pain, dysmenorrhea, vaginal discharge, UTIs, among others
  - The most common adverse reactions leading to discontinuation were:
    - Irregular bleeding (1.7%), headache (1.3%), vaginal discharge (1.3%), and nausea/vomiting (1.2%)

1 http://annovera.com/pi.pdf
Phase 3 Acceptability Study
Demonstrated 1-Year Contraceptive Vaginal System High User Satisfaction

Acceptability Data

- Phase 3 acceptability study (n=905 subjects)
- Overall satisfaction 89% related to ease of use, side effects, expulsions/feeling the product, and physical effect during sexual activity
- High rates of adherence (94.3%) and continuation (78%)

## Annovera Key Clinical Attributes

### Clinical Attributes
- Only FDA approved long-acting reversible birth control that doesn’t require a procedure or repeat doctor’s visit
  - Empowers women to be in complete control of their fertility and menstruation
  - Annovera is the only user-directed single 12-month birth control product
- Highly effective in preventing pregnancy when used as directed (97.3%)
- High patient satisfaction in clinical trials\(^1\) (89% overall satisfaction)
- Low daily release of ethinyl estradiol (13 mcg)
- Only product with new novel progestin - segesterone acetate\(^2\)
  - No androgenic, estrogenic or glucocorticoid effects at contraceptive doses
- Favorable side effect profile including low rates of discontinuation related to irregular bleeding (1.7%)
- Safety profile generally consistent with other CHC products, including boxed warning

### Physical Attributes
- Softer and more pliable than NuvaRing
- Acceptable for women who haven’t had a child (nulliparous) or are not in a monogamous relationship\(^3\)
- “Vaginal System” – the only product in a new class of contraception with potential for $0 co-pay
- Cost and convenience (pharmacy and doc visits)
- Does not require refrigeration by HCP

Top Contraceptive Products Based on Revenue

![Bar chart showing 2017 Net Revenue (mm) for various products](chart_image)

- **NUVARING**: $564 mm
- **NEXPLANON IMPLANT**: $496 mm
- **LO LOESTRIN FE BIRTH CONTROL PILL**: $420 mm
- **MIRENA IUD FAMILY (INCLUDES MIRENA, KYLEENA & SKYLA)**: $841 mm

This includes 3 products

Company filings; Symphony Health Solutions PHAST Data powered by IDV. Net sales as reported in company filings.
Large Established Ring Market

Annovera compared to existing NuvaRing and potential NuvaRing generic

- 1-year duration (vs. monthly)
- Soft, pliable, squishy (vs. semi-rigid ring body)
- 89% overall patient satisfaction in clinical trials¹
- High rates of adherence (94.3%) and continuation (78%)¹
- New/Lower hormones
  - New progestin segesterone acetate (vs. etonogestrel)
    - No androgenic, estrogenic or glucocorticoid effects at contraceptive doses²
  - 13 mcg ethinyl estradiol (vs. 15 mcg)
- No monthly hormonal burst from each new NuvaRing placed
- No refrigeration required by HCP
- Low discontinuation rates³
  - Annovera: Irregular bleeding 1.7%, headache/migraine 1.3%, vaginal discharge/infections 1.3%, nausea/vomiting 1.2%
  - NuvaRing: Device-related events 2.7%, mood changes 1.7%, headache (including migraine) 1.5% and vaginal symptoms 1.2%
- Less expensive ~$1,400 for Annovera vs. $2,013 for NuvaRing based on annual WAC price
- “Vaginal System” - a new class of contraception with potential for $0 co-pay
- NuvaRing no longer actively promoted

³ Based on product Prescribing Information; not a head to head comparison
Unique Product Characteristics Should Lead to Good Payor Coverage

- Anticipate parity or discount pricing level ~$1,400 annual WAC cost
  - 30% decrease to annual WAC of NuvaRing, reflects TXMD’s responsible brand pricing
  - Allows for improved patient adherence and a potential decrease in unplanned pregnancies
  - Only one pharmacy fill fee per year (estimated savings of $33 annually per patient)
  - No repeat office visit or procedure fees (several hundred dollars per patient)
  - Contains ethinyl estradiol and Nestorone®, a new and unique progestin
  - “Vaginal System” - a new class of contraception with potential for $0 co-pay

The Affordable Care Act (ACA) mandates that private health plans provide coverage for one treatment per class of contraception used by women with no patient out-of-pocket costs
1-Year Vaginal Contraceptive System Serves an Unmet Need in the U.S. Contraceptive Market

Commercialization Strategy

Launch Timing

- Estimated to be commercially available as early as Q3’19 with commercial launch as early as Q4’19 to Q1’20

Attractive Market Segments for Annovera

- NuvaRing users – leveraging the physical and clinical strengths of Annovera
  - No additional sales representatives needed
  - 81% of total prescribers within current 150 TXMD territories

- Women who want long-acting reversible contraception but don’t want a procedure

- Providers that do not want to purchase and manage inventory of IUDs and Implants

- Women who haven’t had a child (nulliparous) or are not in a monogamous relationship and want long-term contraceptive options

3-Month Contraceptive Vaginal Ring (NES/E2)

Next Generation
1-Year Contraceptive Vaginal System (NES/EE)

Exclusive rights to negotiate co-development and marketing rights

- 3 month ring using NES plus bio-identical Estradiol (E2) (Phase 2)
- 1 year contraceptive vaginal system (NES/EE) life cycle management

1 TXMD has the option to co-develop and market in the US, if approved
Approved for the treatment of moderate-to-severe dyspareunia (vaginal pain associated with sexual activity), a symptom of vulvar and vaginal atrophy (VVA), due to menopause.

Vulvar and Vaginal Atrophy (VVA) Program
Vulvar and Vaginal Atrophy (VVA)

- A component of genitourinary syndrome of menopause (GSM)
- **Chronic** and **progressive** condition that results from decreased estrogen levels characterized by thinning of vaginal tissue
- Diagnosed in approximately **50%** of postmenopausal women
- Primary symptom = dyspareunia (painful intercourse)
- Secondary symptoms include: vaginal dryness, itching, irritation, bleeding with sexual activity, dysuria, urgency, frequency, recurrent UTIs, and incontinence
- Current treatments include: prescription hormone creams, tablets, and rings in addition to over-the-counter lubricants

**Healthy Vaginal Tissue**
- Thick
- Moist
- High estrogen level
- Low pH (<5)
- Increased superficial cells (>15%)
- Decreased parabasal cells (<5%)

**Atrophic Vaginal Tissue**
- Thin
- Dry
- Low estrogen level
- High pH (>5)
- Decreased superficial cells (<5%)
- Increased parabasal cells (>30%)

---

Professional Societies and FDA Recommend the Lowest Effective Dose

American College of Obstetricians and Gynecologists (ACOG)¹

“Low-dose and ultra-low systemic doses of estrogen may be associated with a better adverse effect profile than standard doses and may reduce vasomotor symptoms in some women.”

North American Menopause Society (NAMS)²

“The lowest dose of HT should be used for the shortest duration needed to manage menopausal symptoms. Individualization is important in the decision to use HT and should incorporate the woman’s personal risk factors and her quality-of-life priorities in this shared decision.”

FDA³

“...this guidance encourages sponsors to develop the lowest doses and exposures for both estrogens and progestins for indications sought, even though specific relationships between dose, exposure, and risk of adverse events may not be known.”

Imvexxy is “Redefining Relief”

<td>5.4%</td>
</tr>
<tr>
<td>Generic Estradiol Tablets (including Yuvalfem and others)</td>
<td>-</td>
<td>24.4%</td>
</tr>
<tr>
<td>Total</td>
<td>29.7%</td>
<td>29.8%</td>
</tr>
</tbody>
</table>

- Yuvalfem continues to take market share from **only** Vagifem
- No substitution or cannibalization of other branded products
Prior Authorization Example in the VVA Class

- The majority of commercial payers do not require PA/ST for branded VVA treatments today\(^1\)
- However, select payers require written PA and step-through one or two preferred products in select cases
  - Unlikely for Imvexxy to step-edit through a higher dose vaginal estrogen product
- Low dose vaginal estrogen remains frontline therapy

Example 1: PA Criteria for Osphena at Anthem\(^2\)

Recent VVA TRx Launch Trajectories Represent Reasonable Comparators for Imvexxy Launch in Year 1

Rate Limited Factors in Year 1 that Impact Launch:

- Limited number of new women going onto therapy each year
- Number of women that switch to a new product year 1
- The impact of the above factors is reduced in years 2 and beyond

- Developed over the past 6 years in an effort to improve the long term value of a patient through Education, Adherence and Co-Pay assistance
- TXMD utilizes standard pharmaceutical industry programs in a more coordinated and effective fashion – maximizing impact and results
- Program has achieved 78% utilization of the Co-Pay assistance program compared to an industry standard of 30%
- Created and piloted around the prenatal vitamin product line to enhance the launches of Imvexxy and TX-001HR (if approved)
Results of TXMD Prenatal Vitamin Adoption & Adherence Programs

### Patient Adherence

Imvexxy Launch

- July 9, 2018 an early experience program with the 10 mcg dose of the Imvexxy monthly starter pack was sampled to a select group of healthcare providers (HCPs)
  - As of August 16, 2018
    - Over 1,700 HCPs started at least 1 patient on the sample starter pack and sent in a prescription for the maintenance pack
    - At least 2,400 patients have already received their first maintenance pack*
- Full national launch commenced August 6, 2018 for 10 mcg dose
- 4 mcg dose expected to be available September 10, 2018
- Bio-Ignite went live August 10, 2018 with 12 pharmacies ordering Imvexxy

TX-001HR

Combination Estrogen + Progesterone (E+P) Program
TX-001HR Product Development Rationale

- 2002 Women’s Health Initiative (WHI) study showed that the long-term use of certain *synthetic* hormones (a combination of medroxyprogesterone and conjugated equine estrogens) increased the risk of breast cancer, stroke, heart attack and blood clots (all FDA-approved combination hormonal products contain a synthetic Progestin and not a bio-identical Progesterone)

- 2002 Post WHI, women and healthcare providers shifted to Bio-Identical Hormone Therapy (BHRT) containing bio-identical estradiol and bio-identical progesterone as an alternative despite being *unapproved* drugs that are *not covered by insurance*
  
  - Over 90M+ scripts of synthetic hormone therapy prescribed annually before 2002, declining to ~26M in 2015\(^1\)

- Today, patients have the choice between three therapies:
  
  - FDA-approved, *synthetic* combination hormones
  - FDA-approved, *separate* bio-identical hormone products
  - Unapproved, *compounded* bio-identical hormones that have not been proven safe and effective, or covered by insurance

- Compounding filled the need for BHRT
  
  - 30M scripts (3M women) of Compounded Bio-identical Hormone Therapy (CBHRT) prescribed annually in the U.S. currently\(^2,3\)

- All the major medical societies and the FDA discourage the prescribing of compounded hormones

- No FDA-approved BHRT bio-identical combination product of estradiol + progesterone

- If approved, TX-001HR would become the first and only FDA-approved bio-identical combination product to fill this unmet need

---

1) Symphony Health Solutions PHAST Data powered by IDV; Annual 2015
2) The reported number of annual custom compounded hormone therapy prescription of oral and transdermal estradiol and progesterones taken combined and in combination (26MM to 33MM)
**TX-001HR – Potential Best in Class Therapy**

**Potential first and only:**
1) Bio-identical combination estradiol & progesterone
2) FDA-approved

**Dosing and Delivery**
- Once-a-day single oral softgel capsule

**Addresses Unmet Medical Need**
- First and only combination of bio-identical estradiol and bio-identical progesterone product candidate
- Single combination dose option
- Positive Phase 3 Replenish Trial safety and efficacy results
- Potential third-party reimbursement, if approved

**PDUFA target action date October 28, 2018**
- Strong patent estate with patent expirations starting 2032

**Benefits to women, healthcare providers, and pharmacies**

- **FDA-approved separate bio-identical estrogen and progesterone channel** alone represents up to $950M annually at a WAC price of $250
  - 2 separate copays
  - Not FDA approved to be used together for endometrial protection
- **Potential billion dollar opportunity with even only limited penetration into compounding channel**

TX-001HR Could Fulfill Therapeutic Gap For Stakeholders

**Patients**
- If approved, meet demand for bio-identical hormone therapy with a product approved by FDA on safety and efficacy
- Reduce of out-of-pocket costs via insurance coverage
- Convenience of one combination product
- Widely acceptable at pharmacies and not just compounding pharmacies

**Healthcare Providers**
- First and only FDA-approved bio-identical combination hormone therapy
- Clinically validated dose regimen
- Eliminate risks of compounded hormone therapy
- Meet patient demands and reduce patient out-of-pocket costs via insurance coverage
- Follow medical standards of care and society guidelines while reducing liability

**Pharmacies**
- Meet patient and physician demand for bio-identical hormone therapy
- Assuming third-party reimbursement, significantly improve net margin per script
- Lower certain legal and regulatory costs and risks

**FDA/Regulatory Bodies**
- Reduce need for and use of compounded hormone products
- Full enforcement of regulations regarding compounded hormones
BIO-IGNITE™ started as an outreach program to quantify the number of compounded bio-identical estradiol and progesterone prescriptions currently dispensed by the 3,000 high-volume compounding pharmacies, and qualify their interests in distributing our hormone product candidates, if approved.

WHAT IT HAS BECOME:
A four-phase strategic initiative to activate all current stakeholders involved in the BHRT community. Ensuring that TX-001HR has the best national access and uptake possible.
BIO-IGNITE™ Progress and Results
