#### **Cost of Goods Sold/Gross Margin**

- Cost of goods sold decreased \$1.1 million to \$3.3 million for the third quarter of 2020 compared to \$4.4 million for the second quarter of 2020.
  - The second quarter of 2020 included a non-cash write-off of \$1.9 million primarily related to BIJUVA inventory obsolescence as a result of the Company's reprioritization of selling resources to ANNOVERA and IMVEXXY, together with the impact of the COVID-19 pandemic on sales forecasts of BIJUVA for future quarters, which was partially offset by the increase in cost of goods related to increased unit sales for the quarter.
  - O Gross margin percentage increased to 83% for quarter ended September 30, 2020 inclusive of the license revenue of \$2 million (81% when excluding license revenue), as compared to 59% for the quarter ended June 30, 2020, which was impacted by the non-cash write-off of \$1.9 million.

#### **Expense, EPS and Related Information**

- Total operating expenses, excluding non-cash items, decreased by \$11.0 million to \$37.1 million for the third quarter of 2020 as compared to \$48.1 million for the second quarter of 2020.
  - 0 The decrease in operating expenses was primarily a result of the Company's cost containment efforts to reduce overall spend.
  - For the remainder of 2020, the Company anticipates that spend will focus on delivering the necessary resources to support the launch of ANNOVERA, continued ramp-up of IMVEXXY, and ongoing brand management of BIJUVA.
- Net loss for the quarter ended September 30, 2020 decreased to \$32.6 million, or \$0.12 per basic and diluted share, compared with \$52.0 million, or \$0.19 per basic and diluted share, for the quarter ended June 30, 2020.
  - Net loss per share for the second quarter of 2020 was negatively impacted by inventory and sample expense charges related primarily to BIJUVA of \$0.02 per basic and diluted share.

#### **Balance Sheet**

As of September 30, 2020, the Company's cash on hand totaled \$79.6 million, compared with \$113.8 million as of June 30, 2020.

#### Potential vitaCare Divesture

TherapeuticsMD today announced the commencement of a process to divest vitaCare Prescription Services. In recent months, the COVID-19 pandemic has highlighted the value of pharmaceutical companies being able to connect directly with patients. The Company's vitaCare Prescription Services model is designed to make a complex process of filling prescriptions simple, cost-effective, and stress free for patients. This in combination with the rise of interest and investment in other hub service and pharmacy services companies has driven outside interest in vitaCare both from pharmaceutical companies seeking to utilize vitaCare for their products and from potential partners or sponsors seeking to acquire a controlling interest in vitaCare. The Company's goal is to unlock substantial value for its shareholders by divesting vitaCare to a partner who can capitalize the business opportunity. Based on initial indications received, the Company believes the enterprise value of vitaCare with the right partner can be upwards of \$100 million, and, depending on the ultimate transaction structure, could potentially generate at least \$50 million in non-dilutive proceeds to the Company, while also retaining an interest in the newly-capitalized business. The Company intends that vitaCare's existing dedicated management team will continue to operate the business to ensure the current level of service to TherapeuticsMD and new customers. The Company has retained Greenhill & Co. as an advisor for the transaction.

#### Sixth Street Update

The Company entered into an agreement with its lender, Sixth Street Partners, to lower the minimum cash balance requirement under the Company's Financing Agreement from \$60 million to \$45 million through year end.

## Potential vitaCare Divesture

- vitaCare makes a complex process of filling prescriptions simple, cost-effective, and stress free for patients
- In recent months, COVID-19 has highlighted the value of pharmaceutical companies being able to connect directly with patients
  - This in combination with the rise of interest and investment in both HUB service and pharmacy service companies has driven outside interest in vitaCare
- Goal to unlock substantial value for our shareholders by divesting vitaCare to a partner who can capitalize the business opportunity
- Based on initial indications received, we believe the enterprise value of vitaCare with the right partner can be upwards of \$100M, and, depending on the ultimate transaction structure, could generate at least \$50M in non-dilutive proceeds to TherapeuticsMD, while also retaining an interest in the newlycapitalized business
- We intend that current vitaCare Management will remain with vitaCare to ensure current service level for TherapeuticsMD and new customers

Company has retained Greenhill & Co. as an advisor for the transaction

## National Academies of Science, Engineering and Medicine (NASEM)

- Report commissioned by FDA and published on July 1, 2020 to gain independent analysis of the safety and public health risk related to compounded bio-identical hormones (cBHRT)
- NASEM recommendations for stronger regulation and discipline around promotion and dispensing of compounded bio-identical hormones
- The cBHRT market size is ~12-18 million prescriptions a year in the US
- Compounded preparations are often marketed as safer alternatives to the FDA-approved hormone products; however, the FDA does not review or approve compounded preparations for safety, quality, or effectiveness
- As a result, FDA asked the National Academies to convene a consensus study to evaluate the safety, effectiveness, use, and overall clinical utility of cBHRT

# **Closing Remarks**

## Q&A

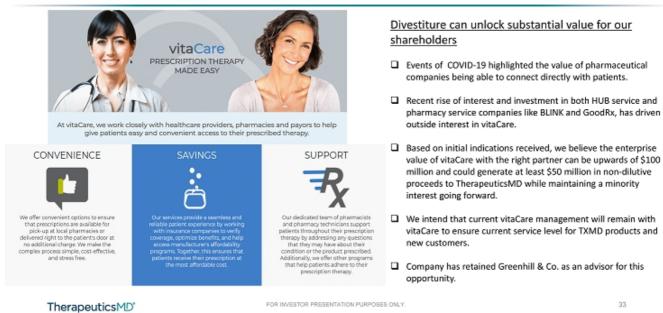

## **Reported Prescription Volume for TherapeuticsMD Products**

- TherapeuticsMD's continues to see growing trends in orders from wholesalers, retail pharmacies, online telemedicine
  pharmacies and our secondary channels (internal data) for all of our FDA approved products.
  - The trend in these sales to wholesalers and pharmacies on a unit basis are consistent with the trends in the reported prescriptions filled by patients in the quarter.
- Based on comparison of our internal data vs prescription tracking data, the Company believes that industry prescription tracking databases (both Symphony and IQVIA) do not fully capture the diversity of prescriptions being filled particularly in our multiple secondary channels, such as Bio-ignite pharmacies, telemedicine pharmacies, public health and the military.
  - ANNOVERA volume levels are relatively small (1/100<sup>th</sup> %) compared to birth control for the category reported on a weekly basis causing certain data to be under-represented in the projection methodology.
  - Menopause Products Prescription volume to patients as reported has been understated by approximately 10-15%
- October Trends in ANNOVERA prescription reported by Symphony Health (week ended 10/30/2020)
  - 21% increase in last 4 weeks over previous 4 weeks
